

# CERDAAC Enroll & Control Cloud

90% of quality leaders indicate  
maintaining compliance  
is their top challenge

## Business Challenge

A recent study by the FDA Group indicated the top three challenges of Quality Leaders are maintaining compliance, improving manufacturing/production performance and bringing new products to market.

In order to ensure compliance, Quality Leaders must effectively manage assets across sites and the organization, from onboarding through retirement. Each asset has unique requirements to ensure its ongoing operation, accuracy, and safety. These requirements might include regular verification, validation, calibration, testing, etc. It's imperative that every asset used in operations is properly enrolled in the appropriate programs and systems.

# Ensure Asset Compliance

CERDAAC Enroll & Control Cloud helps manufacturers ensure that every asset in the plant is kept in compliance with evolving quality and regulatory requirements. It confirms that new assets have been properly enrolled in all the right systems and programs such as validation, calibration, preventive maintenance, and ESD testing. It verifies that asset change requests are properly vetted and approved prior to deployment.

Purpose-built for regulated manufacturers, CERDAAC Enroll & Control Cloud provides highly efficient asset oversight, tailored to your unique needs, including:

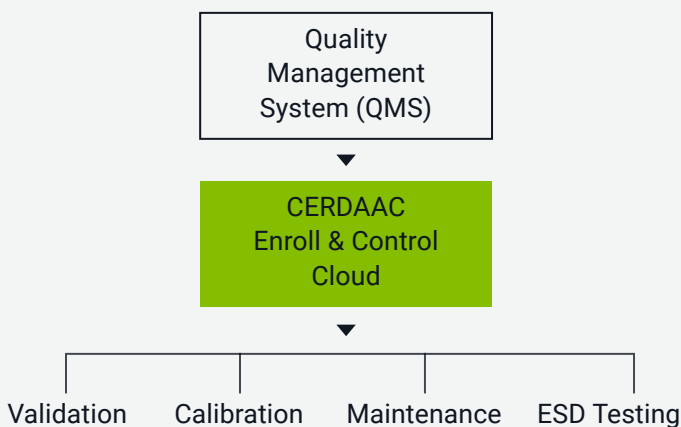

- New asset onboarding and enrollment
- Asset change requests and approvals
- Custom eforms for enrollment and change control
- Custom review and approval workflows with digital signatures
- Visibility of all assets and their status, across the plant, enterprise, and supply chain
- Ability to define asset hierarchy (parent / child relationships)
- Asset information repository
- Asset ID generation and labeling
- Asset scanning, tracking, and inventory management
- Single system of record for all assets
- Robust and searchable audit trails

Ensure Asset Compliance

Increase Operational Efficiencies

Extend the Life of Assets

Regulated Operations Excellence Matrix

Quality requirements

**Enroll:** Ensures every asset is properly enrolled in all appropriate programs before being deployed

**Control:** Ensures every asset change request is reviewed and approved prior to deployment

Program execution

## Regulated Ops Excellence

CERDAAC is a connected suite of digital solutions to ensure compliance and maximize profitability

CERDAAC is a highly configurable regulated operations excellence platform that automates and coordinates calibration, maintenance, validations, and other processes to ensure compliance with greater efficiency and less downtime. Trusted by thousands of organizations worldwide, CERDAAC is purpose-built for highly regulated manufacturers who need to deliver high quality products and profits while meeting complex regulatory requirements.

- Native cloud, managed by SIMCO, powered by Google
- Enterprise grade, scalable, and extensible
- Easily tailored forms, notifications, workflows, reports
- Purpose-built for highly regulated manufacturers
- Pre-validated to comply with FDA 21 CFR part 11
- Single, unified, intelligent system of record
- Seamless integration with other systems of record
- Supported by 300+ lean operations experts

**Let's talk about how  
CERDAAC can assist  
you on your operations  
and quality digital  
transformation journey**
