On average, manufacturers pay $19,564 per employee per year to comply with federal regulations"
-National Association of Manufacturers

Business Challenge

In regulated manufacturing environments, compliance is often one of the most challenging and time-consuming tasks. In addition to product and process compliance regulations, manufacturers are increasingly facing challenges with workforce compliance. Employees have a growing list of licenses and certifications that are required to do their jobs. Regulating bodies like the FDA, USDA, OSHA, and others ensure that goods and services, as well as the people who produce them, meet rigorous quality and safety standards.

Non-compliance with workforce regulations can lead not only to fines from regulating bodies, but also to labor shortages and even unplanned production stoppages. Tracking and managing workforce compliance is a crucial aspect of manufacturing in regulated industries.

Workforce Management Excellence

CERDAAC Workforce Cloud automates workforce compliance management with an intelligent, connected solution. Employee licenses, certifications, trainings, exposure limits, and more can be easily and securely managed with CERDAAC workforce cloud. Complete with automated notifications, reminders, and escalations, CERDAAC ensures that employees are always in compliance with regulations. Purpose-built for highly regulated manufacturers, CERDAAC Workforce Cloud ensures compliance, improves quality, and minimizes production downtime. Features include:

- Qualifications and training management
- License and certifications management
- Policy acknowledgments
- Incident reporting and tracking
- Workforce non-conformance management
- Compliance meeting tracking and documentation
- Notifications and escalations for scheduled events
- Automated routing and approval of forms
- Comprehensive and searchable audit trails
- Robust and configurable dashboards and reporting

CERDAAC

- Custom Cloud
- Calibration Cloud
- Product Cloud
- Maintenance Cloud
- Partner Cloud
- Enroll & Control Cloud
- Workforce Cloud
- Facility Cloud

CERDAAC is a highly configurable regulated operations excellence platform that automates and coordinates calibration, maintenance, validations, and other processes to ensure compliance with greater efficiency and less downtime. Trusted by thousands of organizations worldwide, CERDAAC is purpose-built for highly regulated manufacturers who need to deliver high quality products and profits while meeting complex regulatory requirements.

- Native cloud, managed by SIMCO, powered by Google
- Enterprise grade, scalable, and extensible
- Easily tailored forms, notifications, workflows, reports
- Purpose-built for highly regulated manufacturers
- Pre-validated to comply with FDA 21 CFR part 11
- Single, unified, intelligent system of record
- Seamless integration with other systems of record
- Supported by 300+ lean operations experts

Let's talk about how CERDAAC can assist you on your operations and quality digital transformation journey
