

# CERDAAC Calibration Cloud

The cost of failure is  
100 times greater than  
the cost of prevention

## Business Challenge

In today's highly competitive markets, manufacturers must deliver products and profits while also meeting complex quality and regulatory requirements. This requires rigorous coordination across quality, operations, and outside suppliers.

Consistent, accurate calibration prevents costly quality problems downstream. It's also a critical compliance function, requiring thorough documentation. Thoughtful automation is key to ensuring that assets are calibrated on time, with the correct procedures, and with full documentation and traceability.

Calibration automation also drives program excellence by identifying and escalating non-conformances, tracking key performance metrics, and highlighting areas for improvement.

# Regulated Calibration Excellence

CERDAAC Calibration Cloud is a highly configurable solution that automates, manages, and harmonizes calibration and operations to ensure audit success, drive operational efficiencies, and minimize downtime. Purpose-built for highly regulated manufacturers, CERDAAC Calibration Cloud includes advanced workflows for all your calibration processes including:

- Automated calibration scheduling, documentation, reporting
- Notification of upcoming and overdue calibration tasks
- Instant view of service history, documentation, and certificates
- FDA-compliant digital signatures
- Automated routing and approval of calibration-related forms
- Chain-of-command escalation of pending non-conformances
- Comprehensive and searchable audit trails
- Automated out of tolerance (OOT) notification and case management
- Use trace with forward and reverse traceability
- Calibrated asset management, hierarchy and tracking
- Extensive configurability
- Real-time management dashboards
- Robust library of pre-built reports
- Tailored reports and notifications to each team member

## Regulated Ops Excellence

CERDAAC is a connected suite of digital solutions to ensure compliance and maximize profitability

CERDAAC is a highly configurable regulated operations excellence platform that automates and coordinates calibration, maintenance, validations, and other processes to ensure compliance with greater efficiency and less downtime. Trusted by thousands of organizations worldwide, CERDAAC is purpose-built for highly regulated manufacturers who need to deliver high quality products and profits while meeting complex regulatory requirements.

- Native cloud, managed by SIMCO, powered by Google
- Enterprise grade, scalable, and extensible
- Easily tailored forms, notifications, workflows, reports
- Purpose-built for highly regulated manufacturers
- Pre-validated to comply with FDA 21 CFR part 11
- Single, unified, intelligent system of record
- Seamless integration with other systems of record
- Supported by 300+ lean operations experts
