Poor maintenance strategies can reduce overall production capacity by 5% to 20%

Business Challenge

Recent studies indicate unplanned downtime is costing industrial manufacturers an estimated $50 billion each year. Performing regularly scheduled maintenance activities increases asset lifetime, helps prevent unexpected failures in the future, and helps to ensure quality compliance.

Today's organizations require real-time visibility of assets and maintenance activities across programs and sites to keep production moving and assets optimized. Without automated scheduling and coordination, equipment maintenance can get overlooked, resulting in unplanned downtime, high repair costs, quality issues, and safety challenges.

Regulated Maintenance Excellence

CERDAAC Maintenance Cloud is an intelligent, connected solution that automates and coordinates maintenance management to ensure compliance, minimize downtime, reduce capital expenses, and drive operational efficiencies. Purpose-built for highly regulated manufacturers, CERDAAC Maintenance Cloud includes advanced workflows for all your preventive and corrective maintenance processes including:

- Automated maintenance scheduling, documentation, reporting
- Early notification of upcoming and overdue services
- Automated routing and approval of maintenance-related forms
- Instant view of service history, documentation and work orders
- Comprehensive and searchable audit trails
- On-Demand work order management with unlimited users
- Proactive parts management
- Technician workload and performance management
- Intelligent eForms with actionable service data
- Extensive configurability
- Real-time management dashboards
- Robust library of pre-built reports
- Tailored reports and notifications to each team member

Minimize Downtime

Powered by CERDAAC

Your Maintenance Cloud

- Enterprise Cloud
- Pre-Validation
- Seamless Integration
- Security & Privacy
- Customizable, Compliant eForms
- Easily Configured Reports & Dashboards
- Configurable Workflows
- Actionable Insights

Regulated Ops Excellence

CERDAAC is a connected suite of digital solutions to ensure compliance and maximize profitability

CERDAAC

CERDAAC is a highly configurable regulated operations excellence platform that automates and coordinates calibration, maintenance, validations, and other processes to ensure compliance with greater efficiency and less downtime. Trusted by thousands of organizations worldwide, CERDAAC is purpose-built for highly regulated manufacturers who need to deliver high quality products and profits while meeting complex regulatory requirements.

- Native cloud, managed by SIMCO, powered by Google
- Enterprise grade, scalable, and extensible
- Easily tailored forms, notifications, workflows, reports
- Purpose-built for highly regulated manufacturers
- Pre-validated to comply with FDA 21 CFR part 11
- Single, unified, intelligent system of record
- Seamless integration with other systems of record
- Supported by 300+ lean operations experts

Let's talk about how CERDAAC can assist you on your operations and quality digital transformation journey
