

## **CERDAAC® 2022** Release Overview

Available December 16, 2022

### Release Highlights

The CERDAAC® 2022 Release introduces new Clouds and provides new functionality and enhancements to SIMCO's pre-validated Asset Management platform.

#### **When**

The 2022 Release will be deployed to all CERDAAC 4.0 users on December 16, 2022.

#### **How**

SIMCO manages the entire CERDAAC upgrade process for you – No end-user action is required.

#### **More Info**

Contact your CERDAAC representative or email us at [softwaresales@simco.com](mailto:softwaresales@simco.com).

## About CERDAAC 2022 Release

CERDAAC is a pre-validated, unified suite of highly configurable cloud solutions purpose-built to help manufacturers in highly regulated industries solve their most important asset management challenges.

### CERDAAC is:

- Purpose-built for regulated manufacturers
- Built on Lean Six Sigma best practices
- Quick and easy to configure to your unique business needs
- Pre-validated for its intended use

With the release of CERDAAC 2022, we are introducing four new Clouds\*:

New

### Enroll & Control Cloud

Ensure every asset in your operation is properly enrolled and managed

New

### Workforce Cloud

Ensure workforce readiness, safety, and compliance

New

### Partner Cloud

Ensure partner quality and compliance, and reduce audit risks

New

### Product Traceability Cloud

Equipment and process traceability for regulated product manufacturers

\*CERDAAC Clouds are paid solutions, additional fees apply.

The new Clouds expand on our industry leading solutions, including:

#### **Calibration Cloud**

Schedule and manage your calibration services

#### **Maintenance Cloud**

Lean maintenance management for your regulated equipment

#### **Facilities Cloud**

Digitize, optimize, and standardize your facility

#### **Custom Cloud**

Digitally transform your unique quality, compliance, and operations processes

## **New Release Functionality and Enhancements**

### **Asset Manufacturer and Model Handling for SIMCO Services Customers**

New functionality is available for CERDAAC customers who engage with SIMCO Electronics for asset calibration services. For customers that manage their own Manufacturer, Model, and Description taxonomies, CERDAAC can now be configured to isolate customer-input values for asset fields from the values SIMCO uses for this information. This allows customers to administrate their values independently of the nomenclature SIMCO employs. Customers interested in leveraging this functionality should reach out to their Account Manager.

## Time Zone Enhancements

This release adds consistency to how the CERDAAC application respects the Company Time Zone setting defined in the Company Information section (accessible to System Administrators). Views and Reports that have date filters such as “Today” or “Yesterday” reference the date relative to the Company Time Zone setting.

## Digital Signatures

The CERDAAC 2022 release brings additional consistency to how the CERDAAC application handles updates to records which have one or more field-level Digital Signatures.

## Audit Logs

Prevents Audit Log entries from being generated by freeform text fields changing from “Initial Value to Initial Value”.

## One-on-One Release Validation Audit Support

If you would like assistance with validation, you can request our optional One-on-One Release Validation Audit Support. Additional fees apply. For more information, please contact your Account Manager or email [softwaresales@simco.com](mailto:softwaresales@simco.com).
